

Top FAQs for Field teams

What is Stadia?

Stadia is Google's cloud-based gaming platform that allows you to play your favorite hit video games across screens instantly with no downloads required.

What are the benefits of having your platform?

There are plenty of benefits including instant access to games on virtually any screen. Also, you'll never have to wait for a download patch or platform update.

What is the benefit of having a Stadia Pro subscription?

Stadia Pro is Stadia's premium subscription service and your gateway to the best that Stadia has to offer. With an active Stadia Pro subscription, you get a variety of perks, including free games each month, exclusive game discounts, and top-tier visual and audio quality.

What happens if I stop my Stadia Pro subscription for some months - will I see my saved progress if I rejoin later on?

If you stop your Stadia Pro subscription, when you rejoin Stadia Pro you may retain the progress you made in previously-unlocked Stadia Pro subscription games and in add-ons you previously unlocked or purchased. Additionally, you may make individual game purchases and resume progress if you previously decided to stop your Stadia Pro subscription.

What's the minimum Internet speed/bandwidth that's needed to use Stadia?

We recommend an internet speed of at least 10 mbps for a 720p experience on Stadia. Faster connections can experience up to 4k streaming, dependent on connection speed.

Top FAQs for Field teams

How many players can play on a Stadia game?

The number is dependent on the game you're playing. Stadia supports full multiplayer titles, as well as couch based co-op and single player titles.

Will I lose my game progress if my Internet connection dips or if I get throttled?

If you happen to lose connection, Stadia will maintain the game where it got cut off for several minutes so that you can quickly get back online without losing progress. Also, if the bandwidth fluctuates, Stadia will adjust to deliver the best possible visual quality at all times.

What is the quality Stadia will stream content at?

Stadia will be able to stream games up to 4K HDR and 60 FPS quality for Stadia Pro subscribers. Non-subscribers can stream games up to 1080p and 60 FPS. Like any other Internet streaming experience, higher quality connections will result in the best experience.
